- IT/data coordination
- project management
- activation

notable
Strict financial limitations
arose late in the game, but
thanks to early planning,
we were able to skirt any
major issues and select from
plenty of product options.

foster global immigration law

case study

A MAJOR PAYOFF MINUS THE PRICE TAG

When this leading immigration law firm made its move from downtown Houston to Greenway Plaza, their real estate broker called on us to help create a gorgeous new space that would attract exceptional employees. Shortly before we entered the order, however, the budget was significantly tightened, forcing us to truly bring our "A" game.

PROJECT OBJECTIVES

- Deliver a beautiful space without splashing the cash
- Collaborate with interior design firm
- Plan early and provide two rounds of value engineering
- Adhere to goals set by real estate broker

For this client and a multitude of reasons, the traditional bid process was not beneficial. Instead, we collected quotes from a variety of different vendors and ultimately chose the one that had the products, price tags, and professionalism for the job. Thanks to smart budget management, we were able to stay within our price range and achieve our ultimate goal – a stunner of an office space, done on a dime.

"Your patient consideration of our needs and feedback helped turn our vision for the new space into a reality. It all came together even better than we hoped — and the staff have been wowed by the new look!"
