information for 2020

products

K1 anchor & friends

storage options

topics anchor scope (credenzas, pedestals, work surface stackers & towers), blending storage

K2 ancillary

a whole different animal

topics getting started, selection, organization, drawing

K3 Knoll electrical

eliminate the shock factor!

topics Knoll power systems, selecting a power system, communicating to electrician, interpole/antenna, system electrical

K4 Knoll equity

a blast from the past

topics panels, connectors, power, worksurfaces, worksurface supports, storage

K5 Knoll & friends

furniture technology options

topics interpole, power cube, horsepower, pixel tables, power modules, systems, other manufacturers

K6 on the fence

currents & antenna

topics currents fence, antenna fence, electrical, pricing

K7 product blending

the do's and don'ts

topics autostrada & reff panels, series 2, supports, template, autostrada/currents spine & fence, screens & modesty panels

K8 adjustable tables

the ins + outs, ups + downs

topics features & options, accessories, planning considerations, installation issues, Knoll & non-Knoll products

K9 textiles

tips to taming the tactile beast

topics textile process, pattern & color trends, content & construction, design & repeat, finishes, performance characteristics

projects

P1 bid strategies

hear it from an expert

topics value engineering, best practices for answering bids, how to make the best use of resources

P2 installation documents

make your installer your bff

topics set up a project from the beginning that will help during installation, critical terms to call out on installation plans, what to include in installation packet, formatting options for installation packets

P3 project process

it takes a village

topics typicals & CAP standards, panel configurations, panel clusters, naming files/elevations/clusters, reconfigurations, dates, CC4 files, estimating design time, dimensions for electrical, project kick off meetings, thinking ahead to install plans

P4 spec checks

10 steps to ensure success

topics what items should be included in spec check packet, who should complete a spec check, what items & details need to be spec checked, how to capture changes that are found during the spec check process

P5 specials

simplifying & accelerating process

topics where to find information on Knoll exchange, submit a custom product request, auto price, search for previously submitted or archived specials, update specials, standard specials, CAP parts

P6 reconfigurations

how to make lemonade with lemons

topics example, setting up drawing files, how to specify, cap compare, tips & tricks

P7 value engineering

how to slash prices and win!

topics overview of price points, product blending to lower costs, package counts, how to interpret bid documents and come up with the lowest cost solution, planning ideas to save design time

technology

T1 25 CAD tips & tricks

BBF bolder better faster NOW!

topics PDSize, layer walk, select similar, REFEDIT, overkill, annotative Dim styles and more

T2 advanced AutoCAD tips & tricks

a furniture guru shares his expertise

topics point entry, interfacing, references, viewports, layouts, customizing

T3 advanced rendering

latest & greatest techniques

topics adjusting heights, overwriting finishes, how to make custom finishes, new features, window scenes

T4 automation center

communicating in the vertical plane

topics dividends horizon panel elevations, template storage elevations, Autostrada/currents elevations

T5 basic rendering techniques

rendering bling

topics create a boundary, open VI from a drawing, change home view, change and apply finishes, add accessories, change flooring and walls, add lighting, create a snapshot, integrating CAP parts

T6 Bluebeam overview

fast-tracking the process

topics ribbon tabs, how to add markups, toolbox, legends, import/export, flattening, adding images and more

T7 CAP worksheet

tips & tricks

topics global options, CAP templates, update against worksheet, copy/paste options, find/replace, link worksheet, discount schedules, reports, adding attributes

T8 CET overview

a glimpse into the future

topics benefits, navigating, architectural components, materials/finishes, paper view/layouts, export/import, specifications, rendering

T9 presentation tips & tricks

drawings that sizzle!

topics 3D drawings, visual impression, attributes & titleblocks, layer manager, CAP reports

T10 mo' CAD/CAP tips & tricks

working smarter not harder

topics CAP parts, CAP standards, draw schedule, highlight by part number, auto hardware, panel builder, option clipboard, find & replace, assign, link worksheets

T11 templates & X-refs

tips to keep your hair from falling out

topics currents fence, antenna fence, electrical, pricing

T12 technology

trending timesavers

topics Trello, Pinterest, Google slides, Bluebeam, Google sheets, Harvest

T13 Knoll on CET

transition 101

topics CET transition basics, change management, toolkit / reusable files, starting a project, rendering from CAP, CET resources
