- furniture planning
- specifications

notable
Kimiko is so familiar with the product and standards of this hospital, they are able to recite individual furniture product part numbers off the top of their heads. This project was completed remotely.

VA Hospital

case study

OBJECTIVES

The goal of this project was to develop a furniture package and specifications that reflected department needs, furniture standards, hospital regulations and fit within the project budget.

- Identify and utilize furniture and products that are movable, flexible, easily configured, durable and adaptable.
- Work closely and effectively with the architect, VA designer, VA project manager and end users.
- Maintain ongoing relationship with service dealer by facilitating clear communication through planning and mutual technical respect.

OUTCOME

With so many stakeholders involved in the process, attention to detail was critical. Kimiko continually referenced the guiding principles and priorities established at the beginning of the project to create a cohesive solution.
