 - graphic design signage package

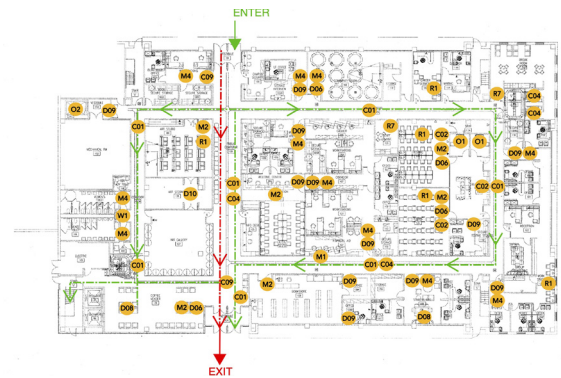

- notable
project included:
- 2M square feet of assessment
 - 3200 social distancing markers
 - 2600 CDC info posters in 4 languages

Houston Community College case study

OBJECTIVES AND SOLUTIONS

- Assess 2M sq ft of campus facilities for interior circulation, pertinent existing conditions, traffic and logistics.
- Research and present COVID-19 CDC guidelines for higher-ed facilities including changes restrictions, closures, and communication protocols.
- Develop on-brand graphic design concept and project management strategy for campus-wide wayfinding and comprehensive facility guidelines.
- Manage logistics for ambitious implementation of 5,800 multilingual signs, markers and barriers, keyed to detailed installation site and floor plans of 20 separate buildings and adjacent grounds.

OUTCOME

As a result of a mega-facility assessment, comprehensive graphic design package, and engaged project management, thousands of graphics were put into place in an expedited manner.

Kimiko Designs nailed it! They worked on a tight timeline, completed site visits and developed a delightfully designed signage program that I couldn't have been more pleased with.
