case study

CHALLENGES AND SOLUTIONS

- Skillfully manage budget, quality, and complex installation schedule by creating meticulously detailed, accurate furniture plans and technical specs.
- Remedy inaccuracies and avoid costly dilemmas by obsessively examining project documents, samples and submittals.
- Engage the multi-disciplinary team through interactive communication and forward-thinking management of immense volumes of information and materials.
- Deliver a smooth multi-vendor, multi-phased activation using hands-on problem solving with surgical precision.

OUTCOME

As technical product and process experts, kimiko brought a stakeholder level of quality assurance to UTMB's Furniture Planning experience. This healthcare system giant values professional furniture planning and looks to kimiko as its furniture consultant and advocate.

> "Kimiko designs has significant depth of experience and approaches projects with a level of detail not seen elsewhere. They were thorough communicators, and worked exceptionally well with the project team as well as the construction trades and multiple furniture vendors."
